

# world class laundry equipment

## Semi-Automatic L-Sealer Wrapper MES 602

A robust and economical L-Sealer wrapping system manufactured to the highest specification to meet the demands of the laundry industry. Ideal for bagging bundles of laundry, large or small using Polythene film, PCW Polythene film, Polyolefin film or the latest generation plastic free films due to its unique sealer blade design.

Product counter and outfeed conveyor timer

Advanced sealer blade design and independent heat control for each blade for smoke free operation

Use latest generation plastic free films due to its unique sealer blade design.

### Key benefits

- Wind handle adjustable deck height
- Perforator device for allowing air to escape from the bag
- Supplied on castors for easy movement
- Powered outfeed conveyor to increase wrapping rates
- Used as standalone wrapper or with a heat tunnel for shrink finishes
- Capable of sealing various film types
- Low electrical consumption

SHRINK **ME** WRAP

# technical data
